Textile Research

Vol. IX, 1938-39

RESEARCH REPORTS AND ARTICLES

Subject Index

	PAGE
Base-Combining Capacity of Wool	245
Capacitance of Textile Materials in Relation to Moisture Content	101
Cellulose Orientation, Strength and Cell Wall Development of Cotton Fibres	355
Comparative Insulative Values of Camel Hair Versus Wool	16
Effect of Size and Size Application on the Properties of Continuous Filament Viscose Rayon	183
Electrophoretic Studies of Silk	374
Electrophoretic Studies of Wool	437
Facts and Theories Concerning the Formation of Natural Silk	329
Natural Pigments of Silk	397
Photomicrographic Method for Determination of Warp Size Distribution on Viscose Rayon	285
Properties of Gelatins and Glues and Their Relation to Warp Sizing	207
Silk Wax and Certain Physical Properties of Raw Silk	175
Some Physical Properties of Cotton Fibres Without "Growth Rings": Note Relative to	325
Specifications of Test Samples Should be Complete and Accurate	5
Specification of Uniform Color Tolerances for Textiles	253, 292
Stabilization of the Viscosity of Potato Starch Pastes	114
Study of Time and Accuracy in Testing Textiles	141
Study of Warp Size Distribution on Continuous Filament Bright Viscose Rayon	409
Surface Fritcion of Yarns	444
Swelling of Raw and Boiled-off Silk in Relation to Width Measurement	79
Technical Evaluation of Textile Finishing Treatments	216
Test of the Alternate Structures Proposed for Cellulose	7
Textile Industry's Research Needs	264
Thin-Boiling and Oxidized Starches	146
Viscosity of Starch Pastes	69

ABSTRACTS

Subject Index (Cross-Indexed)

PAGE

A

Absorption Band of Dyes: Reversible Polymerization as Cause of a New Type of 95
Acetate Rayon: Dry Cleaning of 93
Yarn: New Type 158
Acetylation of Cellulose in the Fibrous State by Two-stage Pre-treatment 192
and Molecular Chain-length of Starch 391
Acid and Alkaline Degradation: Resistance of Formaldehyde-treated Wool Fabric to .. 130
and Chrome Dyes: Unlevel Dyeing of Wool with 127
Determination of—in Wool 233
Dyeing of Wool: Theory of 273
Modification: Effect of—on Properties of Starch Pastes 168
in Wool: Determination of 389
Acidity and Alkalinity in Fabrics by Means of a Micro Glass Electrode 162
in Knitted Wool Goods: Determination of .. 235
Acids: Action of—on Wool Fibres 471
Heat of Reaction of Wool with 431
Adsorbability of Chain Molecules 166
Adsorption of Alkali by Wool 465
Heats of—of Alkalis by Standard Cellulose .. 314
Mathematical Interpretation 318
from Solutions: Theory 318
of Water by Cotton 467
Ageing Process of Alcohol-acetone Solutions of Cellulose Nitrate 200
Air Conditioning and Drying Equations: Review 279
-drying of Textiles 195
Albene and Rhodia Staple Fibres: Properties 269
Albuminoid Fibres: Production 421
Aldehydes on the Quantitative Determination of Cysteine and Cystine: Effect of 131
Alizarin-red Dyeing: Mechanism of 28
Formation of 29
From Turkey Red to 96
Alkali: Determination of—in Wool 277
Alkaline Solutions: Dissolution of Chemically Modified Cotton Cellulose in 468
Alkalies: Attempt to Explain the Swelling Phenomena of Rayon and Staple Rayon Caused by 96
Effect of—on Molecular Chain Length of Chemically Modified Cotton Celluloses .. 318
Allergic Reactions: Problems in the Selection of Textiles and Related Substances in Cases of 465
Amino-acid Analysis of Gelatin 280
Quantitative Determination of 200
Amylase: Rate of Action on Starches 466
Andrew and Langstreth Disc Doubler 93
Animal Fibres: X-ray Structure and Elastic Properties 269
Glues and Gelatin: Preparation and Properties 431

PAGE

Anti-crease Processes for Viscose Rayon 273
Apparatus: Constant-tension Rod-wrapping 235
Aqueous Effluents: Purification of 32
Solution: Decomposition of Cystine in 452
Arsenic and Copper Sulphate: Effect of—on Dyeing Qualities of Wool 428
Ascorbic and Thioglycollic Acids: Mechanism of Histidine Destruction by 132
Ash Pictures: Identification of Fibres and Textiles 162
Avena Coleoptile: Observations on Membranes of Epidermal Cells of 466

B

Bacterial Contamination of Air of Textile Mills .. 166
Basic Yarn Formula and Relation of all Cotton Roving and Yarn Calculations to this Formula 122
Bast Fibres: Determination of Bleaching Quality 162
Bemberg and Viscose Rayon: Staining Test 349
Benzidine Dyes: Constitution and Substantivity .. 273
Bibliography on Methods for Determining the Causes of Damage Appearing in Wool after Dyeing 273
of Textile Test Methods 235
Birefringence of Fibres: Simple Method of Determining 460
Blankets: Suggested Consumer Specifications for Six Classes of Household 346
Bleaching Agents: Degradation of Cellulose by .. 122
of Cellulose 273
Cotton Knit Goods 274
Quality of Bast Fibres: Determination of .. 162
of Wool with Sulphur Dioxide and with Solutions of Sulphites 234
Bobbins: Sampling for Strength Tests 460
Bonding Force of Cellulosic Materials for Water from Specific Volume and Thermal Data ... 121
Buffer Action in Cloth Scouring 274
Built-up Protein Films: Optical Properties and Structure 318
Burr Crusher and Peralta Thread 454

C

Camel Coatings 159
Canvas Disc Wetting Test 235
Cap Spinning: Twist Variations in 271
Carbonizing Acids: Protection of Staple Fibre from 343
Piece-dyeing in Relation to 95
Resistance to—of Cellulose Acetate Staple Fibre 421
Card Stripping using Electrostatic Induction 271
Carpets and Rugs: Progress in Use of Staple Fibres in 195
Casein Fibre (Lanital): Properties and Manufacture 121
Patent: Production of Textile Fibre by U. S. 453
Staple Fibre: Production 121

PAGE

Caustic Soda Solutions: Application of Osmosis to the Recovery of—Containing Hemicellulose in the Rayon Industry 157
Cell Membrane of Cotton Fibre in Cuprammonium Hydroxide Solution: Behavior of 269
Wall: Formation of Cellulose in the 451
Cellulose Acetate Artificial Silk Industry: Birth, Development and Present Position of—in England 421
Fabrics: Patterning by Partial Destruction 388
Rayon: Dyeing 388
Staple Fibre: Resistance to Carbonizing 421
Swelling and Dyeing 388
Acetylation of—in Fibrous State by Two-stage Pre-treatment 192
Action of Dilute Nitric Acid 466
Bleaching of 273
and Cellulose Derivatives: Molecular Weights of 453
Comparison of Degree of Xanthogenation of Natural—and Water-cellulose 240
Degradation by Bleaching Agents 122
in Viscose Process 270
Degree of Polymerization of—in Old Fabrics 466
Derivatives: General Properties of 318
Notes on Processing Woolen and Other Stock Sized with 274
Recent Evolution of 318
X-ray Diffraction Behavior of 240
End-group Determination and Constitution .. 319
Esters: Electrochemical Nature of 279
Ethers 319
Ether Sizing and Finishing Agents 388
Fibres: Action of Light on 422
Mechanism of Tendering 423
Submicroscopic Structure 308
X-ray Diffraction Study of Swelling Action of Several Quaternary Ammonium Hydroxides on 454
Formation of—in the Cell Wall 451
Heat Content of Water Sorbed on 270
Hydrate Filaments: Structure 452
Hydrolysis 278
Isoelectric Point of 193
and Lignin: Bacterial Fermentation 422
and Modified Cellulose: Action of Ozone in .. 121
Molecular Size of—from Different Sources ... 133
Nitrates: Ageing Process of Alcohol-acetone Solutions of 200
Nitrates: Viscosity Studies on 236
Oxidation of 134
Propionate Threads and Films: Production and Properties 122
and Protein Fibres: Structure and Properties 421
Reactions: Mechanism of 156
and Related Subjects: Survey of the American Literature in Field of—for 1933–37 308
Solubility of—in Water 158
Starch and Gelatin Solutions: Effect of Ultraviolet Radiation on Viscosity 467
Threads and Films: Composition of 452
Viscosity of—Solutions 239
Cellulosic Fabrics: Permanent Finishing of 347
Materials: Bonding Force of—for Water from Specific Volume and Thermal Data 121
Centre Selvedge Mechanism 344
Chain Molecules: Adsorbability of 166
Chemofluorescence 467
Chitin Business 122
Chrome Gelatin: Removal of—from Screen Stencils 161
Mordant Color Prints: Soaping of 95
Cleanness of Scoured Wool 163
Clinging Power of Single Cotton Fibres in Relation to their Physical Properties 345
Cloth: Hygienic Properties 345
Scouring: Buffer Action in 274

PAGE

Clothing: On the Reflection Factor of 93
Coagulation: Silkworm Fibroinogen 383
Cold Beam-to-Beam Sizer for Rayon 158
Testing of Synthetic Plastics 464
Colloidal Solutions: Influence of Ultrasonic Waves on Viscosity 279
Color: Its Character, Synthesis and Measurement 279
Matching and Grading: Standardized Daylight to Control 345
Measurement: Fundamentals of 279
New Apparatus for 198
Particular Application of Luther Condition to 167
Objective Measurement of 198
Reaction for Detection of Wool Fibres Treated with Hydrogen Peroxide 461
Relationship of pH to 28
Theory and Color Measurement: Report on .. 167
Colors and Color Measurement: Attributes of 166
Colorimetric Changes Resulting from Variations in Concentration of Dye Solutions 274
Purity: Minimum Perceptible—as a Function of Dominant Wave Length 237
Combing of Good Quality Indian Cottons: Tests 271
Congo Ruby Number: Determining the Dispersing Action of Textile Assistants by Means of 160. 313
Constant-tension Rod-wrapping Apparatus 235
Consumer Specifications for Six Classes of Household Blankets 346
Continental Type Intersecting Gill-boxes 346
Contraction in Twisting 456
Copper Compounds: Function of—in Textile Technology 274
and Manganese in Textiles: Determination of 461
Correlation of Diameter and Denier for Rayon Staple Fibres 123
Cotton: Adsorption of Water 467
Duck and Canvas: Waterproofing 126
Fabric Defects Revealed by Microscope 236
Fibres: Behavior of—in Formation of Cuprammomium Rayon 309
Determination of Swollen Diameter of .. 390
Growth and Structure of 91
Maturity 163
Orientation in—as Indicated by X-ray Diffraction Studies 193
Strength Testing 390
Utilization Coefficient in Yarn 461
Studies in Variation of Strength and Weight per Inch with Group Length of 91
X-ray Diagram: Analysis 390
Goods: Shrinkage of—by Washing 455
Influence of Pre-treatment of—on Quality of Nitrocellulose 385
Knit Goods: Bleaching 274
Mercerization: Influence of Temperature and Alkali Concentration 389
Quality: Factors of 156
Rapid Method for Estimation of Reducing Power in 391
Raw Stock: Dyeing 126
and Rayon: Effect of Purification Treatments on 192
and Rayon Velvet: Uneven Dyeings in 96
Spinning Machine: 200 Years of the 467
and Staple Fibre Mixture Yarns: Mercerization 274
and Viscose Rayon Dyes: Level-dyeing Properties 274
Volumetric Estimation of Moisture with Particular Reference to 429
and Wool: Detection of Spontaneous Deterioration of 166
and Wool: Spontaneous Ignition of Oleïn-impregnated 315
Yarn and Cloth Dyeing and Finishing 159
Cottonized Bast Fibres: Production and Use 423

PAGE

Crease-resistance of Fabrics 233
-resisting and Waterproofing Textile Materials 159
Creasing and Crease-proofing: Theory of 271
Crêpe Fabrics: Rayon and Staple Fibre 386
Cresol and Phenol Resins: Researches on 134
Crumpling (Crushing) Strength of Rayons 95
Crystal Structure of Cellulose and Rubber 200
Cuprammonium Hydroxide Solution: Behavior of Cell Membrane of Cotton Fibre in 269
Hydroxide Solution: Behavior of Plant Fibres Dispersed in 309
Rayon: Behavior of Cotton Fibres in the Formation of 309
Type: Methods of Distinguishing Between Staple Fibre of Lanusa Type and 463
Curling of Yarn: Progress in 387
Cyclol Structure of Proteins 469
Cystein and Cystine: Effect of Aldehydes on Quantitative Determination of 131
and Cystine: Thiol and Disulfide Compounds: Determination of—with Special Reference to 238
Cystine: Decomposition of—in Aqueous Solution 452
Disulfide Linkages in Wool: Action of Sulfites on 193

D

Damaged Silk: Viscosity Test 236
Viscose Rayon and Staple Fibre: Microscopical Examination 236
Wool: Dyeing of 28
Decomposition of Cystine in Aqueous Solution .. 452
Velocity of Viscose in Spinning Process 344
Defects in Grey Goods: Finisher's Viewpoint of .. 389
Deformation Processes and Micellar Structure of Fibres 468
Degradation of Cellulose in Viscose Process 270
Degumming: Effect of—in Finishing Hosiery 389
of Ramie 91
of Silk: Application of Papain in 26
Denaturation and Hydration of Proteins 320
Denier of Staple Fibre and its Practical Evaluation by Figures and Graphs: Investigation of Uniformity of 232, 236
Denitrated Cellulose Nitrates: Structure and Solubility of 193
Dermatitis: Chemical Causes 467
Design of Tappets and Calculation of Available Shed in Plain Weaving 423
Detergency: Additive Effect of Builders in 274
Factors Contributing to 274
Detergent Field: Recent Developments in the ... 160
Dextrin and Soluble Starch: Electro-chemical Properites 279
Dextrins: Constitution of Schardinger 391
Diazosulphonates in Textile Printing 313
Diffraction of X-rays at very small Angles by Cellulose and Rayons 131
Diffusion of Hydrogen through Regenerated Cellulose and Some Cellulosê Derivatives 319
Dilute Nitric Acid: Action of—on Cellulose 466
Disc Doubler: Andrew and Langstreth 93
Discharging Indigo with Nascent Chlorine: Process for 313
Dispersing Action of Textile Assistants: Determining the—by Means of Congo Ruby Number 160, 313
of Cellulose in Cuprammonium Solution 429
Electrokinetic and Coagulation Behavior of Cotton Fibres in Cuprammonium Hydroxide Solution: Observations on 309
Dissolution of Chemically Modified Cotton Cellulose in Alkaline Solutions 468
Drafting Systems: Technological Processes of ... 124
"Drisol" Unshrinkable Treatment of Woolen Goods 162
Dry Cleaning of Acetate Rayon 93
